

Doge Adventure

NFT+Play to Earn+Game-Fi

Among the numerous parallel universes, there's one belonging to **Doge**. **Doge Metaverse** is a world where human and Doge live in harmony. In this world, everyone owns their Doge partner, with whom they explore the unknown, battle against the opponent for upgrading. The portal to the Doge metaverse is now open through the efforts of scientists, players can own a Doge partner at a low cost. Doge partners will have various figure features and rarity levels, and they can PK with other Doge or conduct expedition mining to earn income and increase their rarity.

Doge Adventure Economic model

There are 3 tokens and 3 game props in the game that compose the economic ecology of Doge Metaverse :

DT (Dog Tag)

Main value carrier in the game : Obtained through expedition mining

Doge owner can gain DT when the Doge partner is lost or disappear during fusion

Doge NFT

The 'Pokemon' in the game as well as an inseparable designer toy + Cyber art collection. Obtained through minting or game store.

SPS (Silicone Pieces)

Medium of Equivalent Transaction in the Doge Metaverse : when the game props are on sale in the game store or marketplace, SPS payment is accepted.

剩余DT仅可以通过玩游戏获取

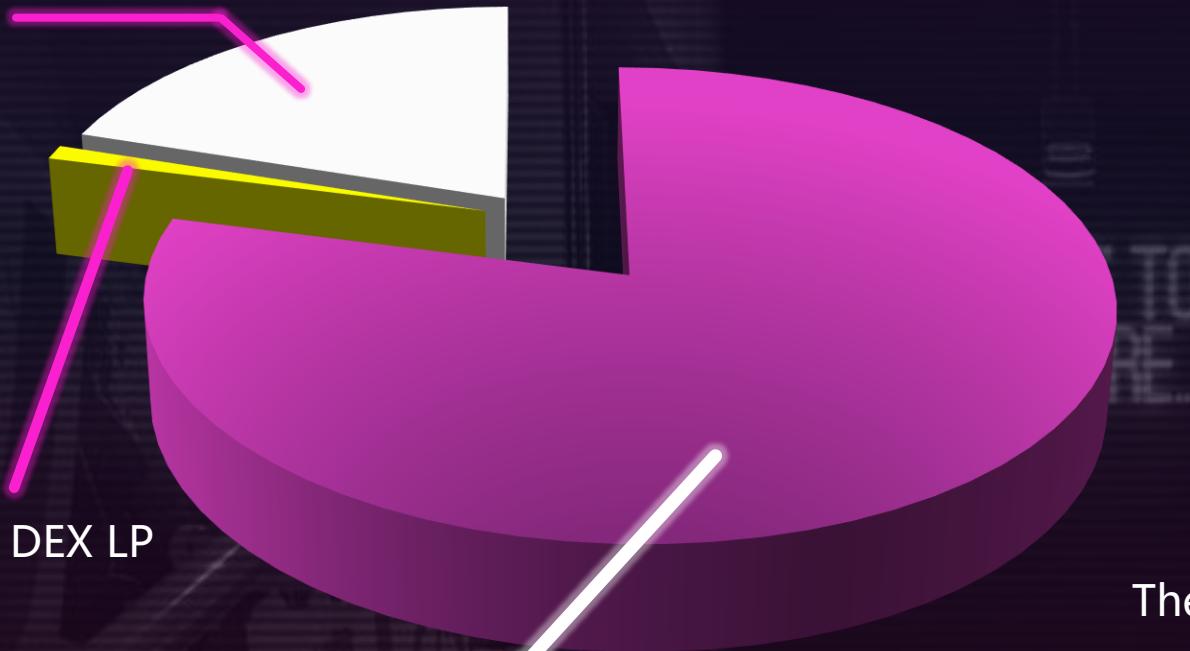

DT是召唤Doge NFT的必需品

是Doge Adventure游戏中最核心的Token

DogeNFT的数量在游戏后期将逐渐变多，导致DT流通量超出初始量时，游戏中消耗的DT将直接销毁，保证DT的数量永远 $\leq 12,500,000$ ，确保游戏内不会产生恶性通胀。

Token metric : DT

Initial total supply : 12,500,000 DT

0 reservation for team other than
fundraising

The remaining DT can be obtained by
playing games

DT is the necessity for summoning
DogeNFT, and it is the core Token in the
Doge Adventure game

The amount of DogeNFT will increase in the later stage of
the game, resulting in the circulation supply exceeds the
initial amount, the DT consumed in the game will directly
be burned to ensure that the amount of DT will always be
LEQ 12,500,000 and no hyperinflation will emerge within
the game.

DogeNFT,Doge super shield,
Random amount of broken shields,DT,SPS
Price : 100 USDT / 90 SPS

Doge super shield

Function 1: Reduce the 70% of staked assets lost when PK fails;
Function 2: If Doge gets lost in metaverse expedition, the shield can send Doge back to the owner.
Price: 125 USDT/120 SPS

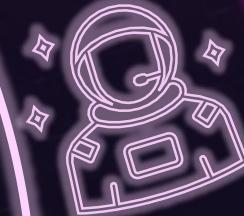

Broken shield

Doge can be found during mining or metaverse expeditions.
10 broken shields + 30 SPS can synthesize 1 super shield

* : SPS can only be obtained through mining or metaverse expedition, similar to SLP in Aixe.

Doge Adventure

Play to Earn rules

Play to earn : PVP

Doge NFT can PK with each other, and the winner can get a superb gain!

The stake of DT, SPS, DogeNFT figure features (at least 1) must be selected as chips when initiating PK.

The challenged player can choose to reject the challenge or bet on the corresponding asset or 1 figure feature as a chip to meet the challenge.

The winning DogeNFT gets access to all the chips bet by the loser; the losing DogeNFT loses the staked chips.

If a DogeNFT loses all of its figure features, the Doge owner is faced with two options.

1. if no treatment, then Doge no longer trusts the owner and leaves home (equal to destruction) and Doge owner gets 20 DT.

2. Enter a 2-month healing cycle. If the Doge owner invites a new player during this period, the healing is accelerated by 1 month for every 250 DT consumed or one Doge NFT cast by the new player's address. If the new player does not consume, the owner needs to wait for the end of 2 months of treatment, Doge can be revived.

Metaverse adventure is 10-20 times more profitable than mining, but Doge has a certain chance of getting lost during the exploration. If Doge NFT gets lost, Doge owners are faced with two choices.

1. Doge owners receive 20/200/1000 DT as compensation.
2. Enter a 3-month Doge search cycle. During this period Doge owner invites new players, new players address every 250 DT consumed or casting a Doge NFT, then healing is accelerated for 1 month. If the new player does not consume, it will take 3 months for Doge to return. Returning Doge star level remains unchanged, but only 1 image feature remains.

*Attached: Doge's chance of getting lost during the cosmic adventure.

- 1-star NFT: 12% chance of getting lost
- 2-star NFT: 8% chance of getting lost
- 3-star NFT: 4% chance of getting lost
